chem.abdelfattah83@gmail.com | Birth Date : 01/08/1983. | Nationality: Egyptian

Profile

Dynamic and results-driven professional with over **19 years** of extensive experience in operations, pre-commissioning, commissioning, initial startup, and shutdown of oil and gas facilities, including petrochemical and polymer plants. Renowned for superior troubleshooting, leadership in safety, and technical expertise, with a proven ability to manage cross-functional teams and complex projects in multinational environments.

Experience

EPRM - Petrosannan Oil & Gas Production

Operation & Maintenance Manager (HG Unit) | Western Desert

June 2023 – Present

- **Facility Management:** Supervise and manage the operations of oil processing equipment, including three-phase separators, heater treaters, freshwater tanks, wash tanks, and production/off-spec tanks.
- **Crude Oil Processing:** Oversee the introduction of crude oil from wells into the three-phase separator for initial separation of oil, gas, and water. Ensure efficient operation and troubleshoot issues as needed.
- **Treatment Processes:** Manage the flow of off-specification crude oil to the heater treater and subsequently to the wash tank, followed by storage in production tanks, ensuring adherence to quality standards.
- **Production Optimization:** Optimize the crude oil treatment processes to maximize efficiency and output, while maintaining the integrity of the production and off-spec systems.
- **Safety and Compliance:** Ensure all operations comply with safety regulations, environmental standards, and industry best practices. Conduct regular safety drills, inspections, and hazard assessments.
- **Team Leadership:** Lead a team of operators and technicians, providing training, support, and performance evaluations to maintain a high-performing workforce.
- **Troubleshooting & Maintenance:** Identify and resolve operational issues related to the three-phase separator and heater treater systems. Coordinate preventive maintenance schedules to minimize downtime.

- **Documentation & Reporting:** Maintain accurate records of daily operations, production data, and maintenance logs. Prepare comprehensive reports for management and regulatory agencies.

EPROM - Nasr Petroleum Company (NPC)

Pre-Commissioning, Commissioning & Startup Operation Manager Assistant | Suez

Jan 2022 – June 2023

- Assisted in the coordination and execution of pre-commissioning, commissioning, and startup activities for the Condensate Distillation Unit (CDU) at Suez Refinery, ensuring adherence to safety and operational procedures.
- Supported the Pre-Commissioning team in verifying mechanical completion, ensuring that all systems and equipment were ready for commissioning, and addressing any discrepancies.
- Collaborated with multidisciplinary teams including Engineering, Safety, and Operations, to ensure that all pre-commissioning testing and commissioning activities met required standards.
- Assisted in the preparation and review of commissioning procedures, ensuring consistency with operational requirements and safety standards.
- Monitored and controlled commissioning and startup activities, coordinating closely with the operations team to identify and resolve any potential challenges that could affect performance.
- Ensured proper execution of system testing, including checking for leaks, pressure testing, and equipment functionality.
- Contributed to the development of safe work practices and emergency response plans for commissioning activities, ensuring compliance with health, safety, security, and environmental (HSSE) regulations.
- Provided support in managing the startup of key units within the Condensate Distillation Unit, ensuring smooth transitions from commissioning to full-scale operations.
- Assisted in troubleshooting issues during startup, quickly identifying and resolving any operational or technical problems to minimize downtime and optimize performance.
- Coordinated with vendors and contractors, ensuring effective communication and oversight during the commissioning phase.
- Participated in the execution of the Plant's overall startup and stabilization process, ensuring all units operated within design parameters.
- Assisted in the completion of handover documentation, ensuring a smooth transition from the commissioning phase to ongoing plant operations.
- Supported the preparation of operational and safety reports, ensuring accurate documentation of commissioning results, and providing feedback for continuous improvement.

EPROM - Middle East Oil Refinery (MIDOR)

Pre-Commissioning, Commissioning & Startup Supervisor | Alexandria Free Zone

Jan 2018 – Jan 2022

- Directed the commissioning of expansion projects, ensuring seamless integration.
- Developed operational and emergency response procedures.

EPROM - Rashid Petroleum Company (RASHPETCO)

Commissioning Supervisor (CWT, ARU, and SRU)

May 2015 – Dec 2017

- Managed commissioning and testing activities, adhering to safety standards.
- Led troubleshooting and resolved issues to ensure smooth operations.

Job Description:

- **Commissioning Oversight:** Led the commissioning activities for key units, including the Crude Wash Tower (CWT), Acid Gas Removal Unit (ARU), and Sulfur Recovery Unit (SRU), ensuring compliance with design specifications, safety standards, and operational requirements.
- **System Testing & Integration:** Managed the step-by-step commissioning process, including system flushing, functional testing, and integration of control systems. Ensured the proper operation of mechanical, electrical, and instrumentation systems.
- **Team Coordination:** Supervised a team of engineers, operators, and contractors during the commissioning phase, ensuring effective communication and collaboration across all disciplines.
- **Safety & Compliance:** Ensured all commissioning activities were carried out in adherence to health, safety, security, and environmental (HSSE) regulations. Conducted regular safety checks, risk assessments, and pre-commissioning audits to identify potential hazards.
- **Troubleshooting & Issue Resolution:** Identified and resolved any issues or discrepancies during the commissioning process, including equipment malfunctions, system failures, and performance gaps. Led troubleshooting efforts to minimize delays and ensure smooth startup.
- **Documentation & Reporting:** Maintained accurate commissioning records, including test results, operational procedures, and system performance data. Prepared comprehensive reports for senior management, highlighting progress, issues, and solutions.
- **Vendor & Contractor Coordination:** Worked closely with vendors and contractors to ensure timely delivery of materials, systems, and services necessary for commissioning. Ensured that all equipment and systems were properly installed and tested.
- **Startup Support:** Assisted in the transition from commissioning to startup, ensuring that all systems were fully operational and performing as expected. Supported the operational team during the initial startup phase to ensure a smooth handover.
- **Training & Knowledge Transfer:** Provided training to operations and maintenance teams on system operation, troubleshooting, and best practices for ongoing plant optimization.
- **Continuous Improvement:** Contributed to the development of improved commissioning procedures and methodologies, enhancing the efficiency and effectiveness of future projects.

-

EPROM - Egyptian Styrene & Polystyrene Production Company (ESTYRENICS)

Commissioning & Startup Supervisor

Apr 2012 – Mar 2015

- Oversaw commissioning of polystyrene facilities, working closely with licensors.
- Conducted safety audits and staff training to uphold best practices.

EPP - Egyptian Propylene & Polypropylene

Commissioning & Startup Supervisor

Aug 2008 – Apr 2012

- Oversaw the world's first commercial implementation of STAR process technology.
- Managed commissioning operations, driving plant performance and reliability.

AFCO - Alexandria Fiber Company

Control Operator (Polymer, Solvent Recovery)

Sep 2004 – July 2008

- Operated polymer process systems and managed solvent recovery processes.

Education

- **Master's in environmental sciences**, Excellent Degree, 2017
- **Bachelor of Science**, Alexandria University, Egypt, Honor Degree, 2004

Certifications

- Energy Management System & Gas Conditioning
- HAZOP Application in the Petroleum Industry
- OSHA Certification: Construction and General Safety
- Process Control and Automated Systems (OGS)
- Oil Processing and Refining (OGS)
- INEOS Licensor Training in Polystyrene
- Safety Auditing (SPOT) & Environmental Performance Evaluation
- Oil Treatment, DCS (Yokogawa), and Pump Maintenance Courses
- Process Safety Management (PSM) and SAPPM Notification
- Firefighting, First Aid, Risk Assessment, and Scaffolding Training

Skills & Abilities

- **Operations Management:** Expertise in commissioning, start-up, and operational management of oil and gas, CDU Refinery and Petrochemicals (PVC, PAN and PP units).
- **DCS Systems:** Yokogawa Centum (CS3000, VP R 6.07), Emerson Delta V, Honeywell, Rockwell Automation FactoryTalk View Site Edition Version 12 (CPR9 SR12)
- **Safety & Compliance:** OSHA, HAZOP, PSM, risk assessment, emergency response
- **Process Optimization:** Efficiency improvements, troubleshooting, and energy management
- **Project Management:** Commissioning plans, startup procedures, and MOC processes
- Developed and implemented commissioning plans, risk assessments, and emergency response protocols.
- Ensuring project milestones and safety standards were met.
- Directed operations to reduce energy consumption and enhance efficiency.
- Coordinated plant performance tests, safety audits, and vendor engagement for optimal system functionality.
- Led emergency response initiatives, enhancing on-site safety and operational readiness.
- **Technical Proficiency:** Proficient in YOKOGAWA, EMERSON Delta V, Schneider, Honeywell DCS, and Rockwell Automation systems.
- **Leadership & Teamwork:** Strong supervisory skills with a focus on safety and team development.
- **Process Optimization:** Skilled in energy management and process safety, with a commitment to minimizing downtime and optimizing resource use.

Activities and Interests

Theater, environmental conservation, art, hiking, and travel
