

ABD EL FATTAH ALI ELEWA

Lead Commissioning, Startup & Operations Specialist

Oil & Gas | Refinery | Petrochemicals | Startup | Troubleshooting | Process Operations

Egypt | +20 101 901 7235 | chem.abdelfattah83@gmail.com

PROFESSIONAL SUMMARY

- Lead Commissioning, Startup & Operations Professional with more than 20 years of experience in refinery, petrochemical, gas processing, and oil & gas facilities. Extensive expertise in pre-commissioning, commissioning, startup, shutdown, operational readiness, performance testing, troubleshooting, and process optimization across complex hydrocarbon processing plants.
- Proven track record supporting major refinery, petrochemical, gas treatment, and oil & gas production projects, including Condensate Distillation Units (CDU), Vapor Recovery Units (VRU), Gas Sweetening Units (GSU), Gas Dehydration Units (GDU), LPG Treating Systems, Fuel Gas Systems, Utilities & Offsites, Instrument Air & Nitrogen Systems, and Oil & Gas Separation Facilities.
- Experienced in leading field and control room operations, coordinating multidisciplinary teams, executing startup and commissioning programs, managing system handovers, and supporting safe plant operation through DCS, PLC, SCADA, ESD, and Fire & Gas systems. Strong knowledge of operational readiness, PSSR, SIMOPS, PTW, LOTO, HAZOP, process safety, and refinery operational excellence.
- Recognized for delivering safe, reliable, and efficient plant startup, operational stabilization, production optimization, and successful transition from project execution to steady-state operations while maintaining the highest HSE standards.

Gas Processing Operations	Refinery Operations	Pre-Commissioning & Commissioning
Startup & Shutdown Operations	Process Troubleshooting	Operational Readiness
Refinery Process Stabilization	Utilities & Offsite Operations	LPG Treating Systems
Fuel Gas Systems	CDU / VRU / GSU Operations	DCS / PLC / SCADA Systems
Process Safety & HSSE	PTW / LOTO Systems	PFD & P&ID Interpretation
Compressors & Pumps Operations	Shutdown & Turnaround Support	Process Optimization Support

PROFESSIONAL EXPERIENCE

Operations & Maintenance Specialist | PETROJET – PETROSANNAN Oil & Gas Production | Mar. 2026 – Present

- Supervised daily operations and maintenance activities for oil and gas production facilities in the Alam El Shawish concession area.
- Supported safe and efficient operation of production manifolds, test separators, three-phase separators, heater treaters, crude oil handling systems, gas compression facilities, and associated utility systems.
- Coordinated field operations, maintenance, and engineering activities to maximize production availability and operational reliability.

- Participated in production enhancement programs including well testing, production optimization, waterflooding support, and hydraulic fracturing campaigns.
- Monitored oil and gas production performance, equipment efficiency, and process operating parameters to achieve production targets.
- Supported startup, shutdown, troubleshooting, and operational stabilization activities for oil and gas production facilities.
- Conducted daily production surveillance, performance monitoring, and operational reporting to support production optimization initiatives.
- Coordinated maintenance planning and execution activities to minimize downtime and improve equipment reliability.
- Participated in root cause analysis investigations and implementation of corrective actions for process and equipment issues.
- Ensured compliance with PTW, LOTO, SIMOPS, Process Safety Management (PSM), and company HSSE requirements.
- Supported drilling and well intervention operations through coordination of production system readiness and facility integration activities.
- Worked closely with operations, maintenance, drilling, reservoir, and production engineering teams to support field development objectives.
- Contributed to initiatives aimed at increasing oil and gas production, reducing operating costs, and improving overall field performance.
- Participated in emergency response activities, safety audits, risk assessments, and operational integrity programs.

**Lead Commissioning, Startup & Operations Specialist – Pre-Commissioning, Commissioning & Startup | PETROJET – NPC CDU-4 & VRU-3 Project | EPROM
Feb. 2022 – Feb. 2026**

- Participated in pre-commissioning, commissioning, startup, and stabilization activities
- Assisted in managing pre-commissioning, commissioning, startup, performance testing, and operational readiness activities for the new **Condensate Distillation Unit (CDU-4)** and **Vapor Recovery Unit (VRU-3)**.
- Coordinated field and control room activities during mechanical completion, system handover, commissioning, startup, and stabilization phases.
- Supported commissioning and startup of a **1.2 MMTPA** Condensate Distillation Unit (CDU-4) designed to increase naphtha recovery and support high-octane gasoline production.
- Participated in commissioning and operational readiness activities for the **320,000 TPA** Vapor Recovery Unit (VRU-3) for butane extraction and hydrocarbon recovery.
- Led system walkdowns, punch list verification, line checks, flushing, leak testing, functional testing, loop checking, and operational readiness reviews.
- Coordinated commissioning activities involving process units, utilities, storage systems, offsites, instrumentation, electrical systems, rotating equipment, and control systems.
- Supported development and validation of startup procedures, operating manuals, commissioning dossiers, and system turnover documentation.
- Participated in performance testing, troubleshooting, startup optimization, and plant stabilization activities to achieve production targets safely and efficiently.
- Coordinated closely with **PETROJET, NPC, EPROM**, engineering, maintenance, construction, and vendor teams during project execution.
- Verified readiness of DCS, SCADA, ESD, Fire & Gas, and process control systems prior to startup and operation.
- Ensured compliance with HSE requirements, PTW, LOTO, SIMOPS, PSSR, and company safety standards throughout commissioning and startup activities.
- Supported emergency response preparedness, operator training programs, and

operational handover to the production organization.

- Monitored startup performance and implemented corrective actions to ensure safe, reliable, and efficient operation of newly commissioned facilities.
- Prepared commissioning reports, startup progress reports, system completion certificates, and operational readiness documentation.

**Operations, Commissioning & Startup Supervisor | EPROM – E-STRYRENICS Project
Dec. 2010 – Jan. 2021**

- Supervised pre-commissioning, commissioning, startup, shutdown, and operational activities for a200,000 MTA Polystyrene Production Plant utilizing INEOS/Lummus technology.
- Coordinated startup and operational activities for GPPS (General Purpose Polystyrene) and HIPS (High Impact Polystyrene) production units, including Swing and HIPS process lines.
- Managed field and control room operations to ensure safe, reliable, and efficient plant performance during startup, normal operation, and shutdown conditions.
- Led system walkdowns, line checks, flushing, leak testing, functional testing, loop checks, and operational readiness verification activities.
- Monitored and optimized polymerization, extrusion, pelletizing, product handling, and utility systems to achieve production and quality targets.
- Coordinated commissioning and startup activities involving rotating equipment, static equipment, electrical systems, instrumentation, DCS, PLC, and utility facilities.
- Participated in troubleshooting process upsets, root cause analysis, performance improvement initiatives, and production optimization programs.
- Supported development and implementation of operating procedures, startup manuals, shutdown procedures, and emergency operating instructions.
- Ensured compliance with HSE requirements, Permit-to-Work (PTW), Lockout/Tagout (LOTO), Process Safety Management (PSM), and company operating standards.
- Collaborated with maintenance, engineering, inspection, laboratory, marine terminal, and technical support teams to maintain plant reliability and operational excellence.
- Participated in plant shutdowns, turnarounds, maintenance coordination, equipment commissioning, and system reinstatement activities.
- Trained and mentored operators on process operation, startup sequences, emergency response, and operational best practices.
- Prepared commissioning dossiers, startup reports, operating logs, performance reports, and system handover documentation.
- Supported continuous improvement initiatives to maximize plant availability, product quality, and safety performance, and operational efficiency.

**Control Operator | Alexandria Fiber Company (AFCO) – Aditya Birla Group |
Sep 2004 – Dec. 2010**

- Operated acrylic polymer and solvent recovery units through Yokogawa CENTUM CS 3000 DCS integrated with FOUNDATION Fieldbus technology.
- Monitored process parameters including temperature, pressure, flow, conductivity, pH, and product quality variables to ensure stable plant operation.
- Performed startup, shutdown, and routine operational activities for acrylic fiber production and associated utility systems.
- Responded to process alarms, abnormal situations, and equipment malfunctions to maintain safe and reliable operations.
- Coordinated with field operators, maintenance personnel, and engineering teams during

plant operation and troubleshooting activities.

- Utilized Yokogawa Plant Resource Manager (PRM) and intelligent field devices for equipment monitoring and predictive maintenance support.
- Participated in commissioning, loop checking, functional testing, and operational readiness activities for DCS and field instrumentation systems.
- Ensured compliance with HSE requirements, operating procedures, and plant safety standards.
- Maintained operational logs, shift reports, process records, and production documentation.

Category	Skills / Expertise
Project Management & Leadership	PMP Certified, RMP Certified, Commissioning & Pre-Commissioning, Startup & Shutdown Management, Operational Readiness, Performance Testing, Plant Turnarounds, Root Cause Analysis, Troubleshooting
Refinery & Oil & Gas Operations	Oil & Gas Production Operations, Refinery Operations, Gas Processing Operations, Production Manifolds, Three-Phase Separators, Test Separators, Heater Treaters, Crude Oil Export Systems, Gas Compression Systems, Produced Water Handling Systems, Oil & Gas Gathering Networks
Petrochemical Operations	GPPS Production Units, HIPS Production Units, Polymerization Systems, Finishing Systems, Acrylic Fiber Manufacturing Process, Product Handling Systems, Process Optimization & Stabilization
Utilities & Offsites	Utility Systems, Instrument Air Systems, Nitrogen Systems, Marine Feedstock Receiving Facilities, Storage Systems, Offsites Operations
Control Systems & Automation	Yokogawa CENTUM VP, Yokogawa CS3000, Emerson DeltaV, Honeywell DCS, Foxboro Systems, Schneider Electric Systems, Rockwell Automation FactoryTalk View SE, PLC Systems, SCADA Systems, DCS Operations
Instrumentation & Digital Technologies	FOUNDATION Fieldbus, Yokogawa PRM (Plant Resource Manager), Intelligent Field Instruments, Process Control & Monitoring, Control Loop Monitoring
Mechanical & Equipment Systems	Rotating Equipment, Static Equipment, Pumps, Compressors, Heat Exchangers, Storage Tanks, Utility Equipment
Electrical & Instrumentation	Electrical Systems, Instrumentation Systems, Field Instrumentation, Control Valves, Analyzers, Instrument Calibration Support
Engineering & Documentation	PFD Interpretation, P&ID Interpretation, Operating Procedures Development, Commissioning Documentation, System Handover Documentation, Technical Reporting
Process Safety & Compliance	PTW (Permit to Work), LOTO, SIMOPS, PSSR, HSE Compliance, Process Safety Management (PSM), Emergency Response Preparedness
Operational Excellence	Process Monitoring, Operational Performance Evaluation, Production Optimization, Startup Sequence Execution, Plant Stabilization, Reliability Improvement, Continuous Improvement Initiatives

EDUCATION

- PhD – Environmental Science and Sustainability | 2025 | Excellent Grade
- Master's Degree – Environmental Sciences | 2017 | Excellent Grade
- B.Sc. Chemistry – Alexandria University | 2004 | Honor Degree

LANGUAGES

- Arabic — Native
- English — Professional Working Proficiency
